

**NO:** MB2008CC-52  
**DATE:** 1/20/2009  
**TO:** **Air Conditioning Original Equipment Manufacturers**  
**FROM:** Emerson Climate Technologies, Inc. – Air Conditioning Division  
**SUBJECT:** **Software Change to Copeland Scroll® Digital™ Compressor Controller**  
**EFFECTIVE DATE:** Immediate  
**ACTION REQUIRED:** Update Part Numbers

Due to our continuing efforts to enhance the functionality of the Digital Compressor Controller, we will modify the controller's cycle time from 20 seconds to 15 seconds and will change the part number associated with this Digital Compressor Controller module. Use of the new controller will improve part load efficiency and offer more precise temperature regulation due to the shorter cycle.

The following Digital Compressor Controller module is affected by this bulletin and will have a new part number:

<b>Old Part Number:</b>	<b>New Part Number:</b>
543-0024-00	543-0024-01

The form and fit of the module will remain the same. We will begin shipping the new part number as soon as existing inventories are depleted. Orders received for the old part number will be converted to the new one.

For additional questions on this change please contact your Emerson Climate Technologies Sales Manager or Application Engineer.
